1. Applicants' arguments in the Amendment filed May 24, 2004 are convincing and therefore the Finality of the last Office Action is hereby withdrawn and all previously indicated objections and rejections are also retracted. Applicants' assertion that Claims 1-18 are subject to rejoinder upon allowance of a linking claim (previously indicated as claim 22) is hereby acknowledged.

2. As claims 19-30 are now in condition for allowance, claims 1-18 are hereby rejoined.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

Bandgap modulation means for compensating the sensed characteristic of the output optical signal containing electric field information for corruption due to temperature variations as further described in claim 1 has not been found in view of Applicants' assertion "the uniqueness afforded by GaAs for measuring electric field and temperature (and for compensating the electric-field measurement for thermal effects) is only described in the present invention" (see page 10, lines 1-3 of Applicants' reply filed May 24, 2004).

Compensating the sensed characteristic of the output optical signal for corruption due to temperature variations with bandgap modulation of at least a portion of the output optical signal as further described in claim 10 has not been found in view of

Applicants' assertion "the bandgap modulation used and claimed in the present invention is never mentioned in the Zhang et al reference, and the joint electric-field/thermal measurement capability of the present invention is not anticipated, taught or rendered obvious by any cited reference including Zhang et al" (see page 10, lines 3-7 of Applicants' reply filed May 24, 2004).

Means for deriving a sensed characteristic independent of temperature variations as further described in claim 19 has not been found in view of Applicants' assertion "the uniqueness afforded by GaAs for measuring electric field and temperature (and for compensating the electric-field measurement for thermal effects) is only described in the present invention" (see page 10, lines 1-3 of Applicants' reply filed May 24, 2004).

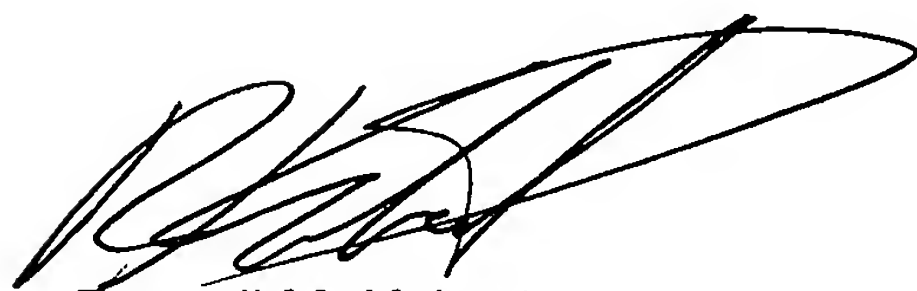

It is further noted that the examiner's reasons are understood to be predicated upon consideration of each of the claims as a whole, and not upon any specific elements of the claims. Moreover, each of the claimed limitations has been considered in view of Applicants' assertions in the reply filed May 24, 2004.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
